

IUCN side-events at COP13

ID	Date/Room/Location	Title/Description/Host Organizations
#1835	Monday 5.12.2016 @ 13:15	Contribution of the Nagoya Protocol to the Sustainable Development Goals
	GRULAC Regional Group Meeting Room Sunrise Building, Second Floor	Genetic resources and sustainable development are inextricably linked. The Nagoya Protocol is uniquely positioned to facilitate this integration through science, technology and traditional knowledge. This side event will have the following objectives: 1) To create awareness about the contribution of ABS projects to the implementation of SDGs; 2) To present an overview of the global portfolio of ABS projects currently under design and implementation that contribute to the SDGs; 3) To underscore the current impact of ABS projects on SDGs and 4) To brainstorm about mechanisms for collecting and reporting SDG data of ABS projects to national statistics/planning institutions UNDP – ABS-Initiative – GIZ – IUCN – UNEP – CBD
#1914	Tuesday 6.12.2016 @ 13:15	To halt the tide of invasive alien species -Honolulu Challenge 2016
	Side event 3 Universal building, main floor	On the margins of IUCN World Conservation Congress members of the IUCN, some Parties to the CBD and Secretariat of the CBD, as well as the relevant organizations with commitment to achieve Aichi Biodiversity Target 9 on invasive alien species launched "Honolulu Challenge". This event follow up the new initiative with the COP13 participants to halt the tide of invasive alien species by 2020. More CBD – IUCN – CSIRO – BirdLife – GBIF – ISSG
#2132	Tuesday 6.12.2016 @ 13:15	Introducing the Coalition on Private Investment in Conservation
	NGOs Group Meeting Room Sunrise Building, Second Floor	In an effort to address an estimated US \$200-300 billion annual funding gap in conservation, 28 civil society organisations, private and public sector financial institutions and academic institutions joined forces to launch the Coalition for Private Investment in Conservation (CPIC) during the IUCN World Conservation Congress. At the side event, Coalition partners will introduce the Coalition and its rationale, present its initial work plan, and explore engagement opportunities for the Coalition and the priority investment areas identified to date. More TNC – IUCN
#1885	Tuesday 6.12.2016 @ 13:15	Promoting the rights based approach into conservation processes: ABS and Consultation processes
	IGOs Group Meeting Room Sunrise Building, Second Floor	This side event will present and highlight the goals, objectives and achievements of the IUCN/UNEP GEF funded project on ABS in the Caribbean Region. It will feature presentations and case study reviews on issues related to ABS and the ratification of the Nagoya Protocol in the Caribbean region. Additionally, the event will present some examples of a new methodology on the community based consultation processes experiences in Central America, designed and implemented as a participatory methodology that has been built and validated with community based organizations and indigenous peoples as a means of enhancing consultations processes on the development of bio-protocols for free prior and informed consent (FPIC). #1916	Tuesday 6.12.2016 @ 13:15	Towards the mid-term progress of the Amazon Vision Initiative (1916)
	Contact Group 2	The event will present a mid-term review of the Amazon Vision Initiative (decision X/31), through regional programs aimed at an integrated approach towards conservation and sustainable use of biodiversity and ecosystems in the Amazon biome. Discussions will highlight the contribution of the Amazon Vision Initiative towards protected areas, SDGs (1, 2, 6, 11, 13 and 15), and productive sectors such as agriculture, forestry, fishing and tourism. Finally, the side-event will address the need to establish collaborative partnerships to strengthen the Amazonian Vision. More
	Universal Building, main floor	UNEP – FAO – IUCN – WWF – OTCA – REDPARQUES
#1620	Tuesday 6.12.2016 @ 18:15	Integrated Oceans Management and Spatial Planning for Healthy Oceans and Sustainable Development
	Side-event 2	This side event – hosted by the Blue Solutions Initiative and the Mami Wata Project – will share knowledge and experiences on the potential of Integrated Oceans Management (IOM) and Marine spatial planning (MSP) for sustainable development in the coastal and marine realm. During this session, findings of the study “MSP – from planning to practice” of UNEP and GEF-STAP and Blue Solutions on IOM will be presented and practitioners will discuss challenges and solutions towards effective planning efforts from different regions and contexts. More
	Universal building	GIZ – IUCN – UNEP
#2252	Tuesday 6.12.2016 @ 18:15	Restoring Forest Ecosystems and Landscapes: examples of country leadership and progress to achieve the Aichi Targets
	IGOs Group Meeting Room	This event will demonstrate how Parties to the CBD are achieving Aichi Targets 5, 7, 11, 12, and 15 through implementation of forest landscape restoration (FLR) in support of the Bonn Challenge. The first part of this event will have experts from IUCN present examples of implementation of FLR in Central America that show that when designing restoration strategies at the landscape level, ecosystem services including biodiversity are internalized as a key component. The second segment will feature countries that have included restoration in their NBSAPS and progress reports, and who have also made contributions to the Bonn Challenge. These experiences will further demonstrate the connections between implementation of FLR and the attainment of the Aichi targets 5, 7, 11, 12, and 15. More
	Sunrise Building, Second Floor	IUCN
#1882	Tuesday 6.12.2016 @ 18:15	Science-policy setting and financial support for invasive alien species management
	Youth Group Meeting Room	Explanation on up-to-date international regulatory framework related to invasive alien species will be provided by the relevant organizations. Opportunities for capacity development for setting regulation on invasive alien species will be described by inter-agency liaison group on invasive alien species
	Sunrise Building, Second Floor	CBD – IUCN – ISSG – WTO

IUCN side-events at COP13

ID	Date/Room/Location	Title/Description/Host Organizations
#2170	Wed 7.12.2016 @ 13:15	Nature-based Solutions for Thriving Urban Communities
	Asia and the Pacific Regional Group Meeting room	This event will explore emerging city and subnational innovation for mainstreaming Nature-based Solutions (NBS) into urban planning and development frameworks. It will share the growing contributions and demonstrate further potential of cities and other subnational governments as key implementation partners of the Convention on Biological Diversity within the context of the SDGs, the Sendai Framework, the Paris Agreement and the New Urban Agenda. More
	Sunrise Building, Second Floor	ICLEI – CBD- IUCN – SwedBio at SRC
#2149	Wed 7.12.2016 @ 13:15	Bridging the science-policy gap for biodiversity and human health: from Science to Practice
	CEE Regional Group Meeting Room	This event provides a critical opportunity to explore how to translate the scientific findings of the State of Knowledge Review Connecting Global Priorities, Biodiversity and Human Health into concrete, scalable and coherent policy action across scales of governance in ways that can tangibly contribute to achieving global commitments set out in the Strategic Plan for Biodiversity 2011-2020 and its Aichi Targets, the SDGs and 2030 Agenda for Sustainable Development. Following presentations by an expert panel on a range of topics at the biodiversity and health nexus, participants will also be invited to engage in an open dialogue with panellists on ways forward. More
	Sunrise Building, Second Floor	CBD – IUCN – UNU IIGH – UNU-IAS EHA – UNEP – Biodiversity international – TRAFFIC
#2100	Wed 7.12.2016 @ 13:15	Can the new IUCN Green List help achieve quality in the performance of protected and conserved areas? including an overview of legal and planning solutions for integrating climate change and biodiversity into protected areas and their landscapes
	Contact Group 8 Meeting	The IUCN Green List is a new global sustainability standard for achieving and recognizing conservation success. This session will provide participants a chance to explore how IUCN and their partners in more than 20 countries have put in place a voluntary Green List programme. We will share examples of how the Green List has already helped drive management effectiveness and equity through the global standard. More
	Universal Building, main floor	IUCN
#1838	Wed 7.12.2016 @ 13:15	Small-scale fisheries and the Aichi Target 11: The importance of livelihoods and food security in MPAs
	Contact Group 3	The event will emphasize that people are an important part of the solution to healthy marine ecosystems, particularly in coastal areas. It will also highlight the Voluntary Guidelines for Securing Sustainable Small-scale Fisheries in the Context of Food Security and Poverty Eradication (the SSF Guidelines). Further, experiences will be shared of community-based fisheries management and conservation programs with a special emphasis on area-based management as referred to in Aichi target 11 (e.g. in the Pacific), as well as discuss strategies for effective fishing community participation in achieving Aichi target 11 and SDG 14 within a context of food security and sustainable livelihoods. More

ID	Date/Room/Location	Title/Description/Host Organizations
#1974	Wed 7.12.2016 @ 18:15	The Road Ahead: Toyota and The IUCN Red List of Threatened Species Partnering with BirdLife International and Conservation International to achieve Aichi Targets and SDG Delivery
	African Group, G/77 and China Regional Group meeting room Sunrise Building, Second Floor	This side event, hosted by Toyota and The IUCN Red List of Threatened Species partners, will describe the work being done to expand knowledge of the extinction risk of species that are crucial to food security. This knowledge will support the delivery of several Aichi targets and implementation of the SDGs, particularly the Zero Hunger Goal. Toyota will explain how this work contributes to the Toyota Environmental Challenge 2050 which embraces not only biodiversity conservation but also climate change - as two sides of the same coin. The event will showcase the importance of working with the private sector to achieve sustainable development underpinned by biodiversity conservation. Followed by the reception - snacks and drinks served. More

#2197	Wed 7.12.2016 @ 18:15	Strengthening global partnerships to recognize the role of indigenous peoples' and community conserved territories and areas (ICCAs) in achieving the CBD Aichi targets 11, 14 and 18
	Contact Group 6 Universal Building, main floor	The side event will review examples of how State Parties to the CBD are (i) partnering with indigenous peoples, local communities and civil society networks in support of ICCAs; (ii) integrating national reporting on both protected and conserved areas to the World Database on Protected Areas (WDPA); and (iii) contributing to the CBD Programme of Work on Protected Areas (PoWPA) element two on governance. The side event will also review resolutions resulting from the recent IUCN World Conservation Congress relevant to the implementation of the CBD Aichi targets. More

#2292	Wed 7.12.2016 @ 18:15	Saving nature's clean-up crew – halting the collapse in vulture populations of Africa and Eurasia and their ecosystem services
	Marie Khan Women's Caucus Meeting Room Sunrise Building, Second Floor	This side event will draw attention to the declines in vulture populations, the consequences for ecosystems and people, and the needs for collaborative action in order for the declines to be stopped and ultimately reversed. Vulture conservation initiatives can lead to the achievement of various Aichi Targets by: preventing species extinction (Aichi Target 12), restoring and safeguarding ecosystem services contributing to health and well-being (Aichi Target 14) and mainstreaming biodiversity for sustainable agriculture (Aichi Targets 2 and 7). More

ID	Date/Room/Location	Title/Description/Host Organizations
#2141	Thursday 8.12.2016 @ 18:15	Launch of IBAT Country Profiles: A decision-support tool to aid national planning and reporting
	Contact Group 3 Universal Building, main floor	This side event will launch the IBAT Country Profiles, a decision support tool to assist Parties and partners by providing data about area-based and species conservation. The tool is developed by UNEP-WCMC, IUCN and Birdlife International. The tool is designed to be particularly useful for tracking progress towards Aichi Targets 11 and 12, related Aichi Targets and other biodiversity-related conventions. The nationally disaggregated spatial data presented in the tool originate from global datasets on protected areas (ProtectedPlanet®), areas of significance for biodiversity (Key Biodiversity Areas), and data about species' extinction risk (the IUCN Red List of Threatened Species™). More IUCN – UNEP-WCMC - BirdLife
#2198	Thursday 8.12.2016 @ 18:15	Other Effective Area-based Conservation Measures
	Contact Group 4 Universal Building, main floor	In response to CBD decision XI/24 (UNEP/CBD/COP/DEC/XI/24), IUCN established a Task Force on Other Effective Area-based Conservation Measures to provide Parties to the CBD relevant guidance on Aichi Biodiversity Target 11. This side event provides an overview of the Task Force's work to date, sets out the Task Force's workplan towards providing guidance to CBD parties, and illustrates how a national-level screening tool might help countries in applying the guidance. More Natural Justice – IUCN – CBD – Mexico
#2246	Friday 9.12.2016 @ 13:15	Integrating Gender Considerations in National Biodiversity Strategies and Action Plans
	Like Minded Mega Diverse Regional Group meeting room Sunrise Building, Second Floor	This event will discuss the outcomes and lessons learned from a pilot project to build capacity of developing country Parties to integrate gender considerations into their biodiversity policy, plans and programmes. The CBD Secretariat collaborated with IUCN's Global Gender Office to support the integration of gender perspectives into the draft NBSAPs of three pilot countries: Mexico, Uganda and Brazil. The event will involve representatives from these countries who will discuss the process they engaged in and the commitments they have undertaken to integrate gender in the implementation of their NBSAPs and biodiversity-related activities. More CBD – IUCN – CONABIO
#2251	Friday 9.12.2016 @ 13:15	Landscape Restoration: Bridging the gap between sustainable rural development and biodiversity targets at the sub-national scale
	Contact Group 6 Universal Building, main floor	The main goal of the event is to outline the steps ahead in the Landscape Restoration Strategy in Mexico for federal and local governments, private sector and potential investment, smallholders and communities, as well as for upscaling subnational initiatives and strategies at the international level. This event aims to reinforce alliances that can promote real options for rural sustainable development in the short term through concerted actions by all stakeholders at the landscape level. #1839	Friday 9.12.2016 @ 13:15	Improving Reporting and Working towards Implementation of Aichi Biodiversity Target 6 on Sustainable Fisheries
	Side-event 1	This event will highlight the results of the Expert Meeting on Improving Progress Reporting and Working towards Implementation of Aichi Biodiversity target 6, which was convened jointly by FAO, CBD Secretariat, IUCN-CEM-FEG, and EBCD, in Rome from 9-11 of February 2016. In particular it will discuss a set of actions and potential indicators that may be used by Parties, other Governments, and relevant organizations to accelerate, monitor and report on progress towards the achievement of Aichi Biodiversity Target 6. More

		IUCN CEM FEG – CBD – FAO
#1616	Friday 9.12.2016 @ 18:15	Using solutions to share knowledge and create evidence-based innovation – an interregional exchange
	Contact Group 5	Let’s not keep reinventing the wheel but learn from each other’s successes in the management and governance of biodiversity and natural resources! This side event – hosted by the Blue Solutions Initiative – will introduce the “solution-ing” approach to distilling key success factors of natural resource management solutions, defining how they work in their unique context and how they can be adapted to new circumstances. In a facilitated discussion, participants and solution providers can discuss how common challenges are addressed in different regions and contexts, and how one could benefit from mutual exchange. More

#1877	Monday 12.12.2016 @ 13:15	Appropriately Recognising and Respecting Indigenous Peoples' and Community Conserved Territories and Areas (ICCAs) Overlapped by Protected Areas
	Contact Group 9 Meeting Room	This side event explores the significance for the CBD of newly-adopted IUCN World Conservation Congress 2016 Resolution 30, “Recognising and Respecting the Territories and Areas Conserved by Indigenous Peoples and Local Communities (ICCAs) Overlapped by Protected Areas,” which affirms that ICCAs should be appropriately recognised and respected when overlapped by protected areas. The side event will raise awareness of provisions in the new IUCN resolution which are addressed to the Parties to the CBD and are relevant to the implementation of article 8(j), article 10(c), PoWPA, and the Plan of Action on Customary Sustainable Use and achievement of Aichi targets 11 and 18. #2237	Monday 12.12.2016 @ 18:15	Key Biodiversity Areas: mapping, monitoring and conserving key sites for conservation
	Contact Group 6	The recent launch of the Key Biodiversity Areas (KBA) Partnership and the Global Standard for the Identification of KBAs is a milestone for escalating the mapping, monitoring and conservation of areas that contribute to the global persistence of biodiversity. This side event will demonstrate: i) KBA relevance to the Strategic Plan for Biodiversity and NBSAPs implementation, ii) how the eleven KBA partner organisations are mobilized to identify, map and document KBAs worldwide and promote targeted conservation action and work with governments and private sector to achieve the global biodiversity targets iii) KBAs as key elements for corporate’s safeguard policies. #1931	Monday 12.12.2016 @ 18:15	Future directions for the European Overseas Initiative BEST
	Contact Group 7 Universal Building, main floor	In 2010 the European Parliament adopted the BEST preparatory action as a pilot initiative to promote the conservation of biodiversity and the sustainable use of ecosystem services, including ecosystem-based approaches to climate change adaptation and mitigation. Six years later, 34 projects on the ground have been financed and 7 regional ecosystem profiles elaborated through collaboration between local and regional actors and European stakeholders, all working towards a sustainable partnership for biodiversity action in the European Overseas. This event will present milestones, achievements, project outcomes and look at next steps to a sustainable financing mechanism for the EU Overseas. More IUCN
#2109	Tuesday 13.12.2016 @ 13:15	Assessing equity in protected area conservation
	Contact Group 6 Universal Building, main floor	This event focuses on assessing progress in achieving the "equitable management" element of Aichi Target 11. The event will be targeted at policy-makers and opinion leaders at national and international levels and aims to: a) provide a clearer understanding of the meaning of equity in the context of protected areas; b) present and discuss practical methods to assess equity in the management and governance of protected areas based on a combination of governance and social impacts' assessment of protected areas. The event will conclude with a broader discussion of the linkages between social/governance/equity assessment at site and system/national level. More IIED – CBD – IUCN – FFP
#2212	Tuesday 13.12.2016 @ 18:15	Mainstreaming Biodiversity in Fisheries: Looking at the separate aspects of Aichi Target 6
	Side-event 2 Universal building	The event aims to discuss what has been learnt from the efforts to address each aspect of target 6 - where are the challenges most troublesome and where does progress seem more feasible. Further, it will aim to identify the most feasible paths for progress. More IUCN CEM FEG – EBCD
#2227	Wed 14.12.2016 @ 13:15	Innovative financial mechanisms for long-term biodiversity conservation: Insights from international cooperation experience
	Side-event 2 Universal building	The funding gap for biodiversity conservation ranges between US\$150 billion and US\$440 billion per year. Eight years ago, the CBD Strategy for Resource Mobilization called on parties to explore new and innovative financial mechanisms at all levels. Be they payments for ecosystem services, environmental trust funds, fiscal reform or others, innovative instruments are needed to complement public investment and better engage with the private sector. In light of the draft decision on Resource Mobilisation (item 11) the side event invites Parties and other stakeholders to share lessons learnt on innovative financial mechanisms and their role in sustainable financing strategies for protected areas at national and site-level. More IDDRI – GIZ – France-IUCN Partnership

ID	Date/Room/Location	Title/Description/Host Organizations
#2180	Friday 16.12.2016 @ 13:15	Dashboard Visualizations for Biodiversity Indicators
	Business Group Meeting Room Sunrise Building, Second Floor	In this side event, NatureServe will launch its Biodiversity Indicators Dashboard, an interactive tool developed in coordination with the Biodiversity Indicators Partnership, that visualizes the health and trends of biodiversity, and tracks conservation performance at regional, national, basin, and site scales. Achieving global biodiversity goals relies on the ability to monitor, measure, and visualize both environmental trends and the progress of conservation programs. Through presentations and hands-on practice, attendees will learn how to use the Dashboard to visualize trends in over 20 indicators of the pressures, state, responses and benefits to biodiversity at the scale they need. More NatureServe – UNEP-WCMC – IUCN – BirdLife – GBIF
#1903	Friday 16.12.2016 @ 18:15	Health and Biodiversity Monitoring to Support Mainstreaming
	Contact Group 8 Meeting Room Universal Building, main floor	This event will present a first-stage concept note developed by the Group on Earth Observations Biodiversity Observation Network (GEO-BON) and EcoHealth Alliance on a systematic approach to integrated human health and biodiversity monitoring. The initiative seeks to develop integrated metrics, indicators and tools to facilitate evaluation, analysis, monitoring and integration of biodiversity into health strategies, plans and programmes. The event will seek input from the biodiversity community on feasibility, priority information to be collected, synergies and collaboration with existing initiatives, and optimal design to inform policy making. More EHA – GEO-BON – CBD – IUCN – Future Earth

Parallel events at COP13

Date/ Location	Title/Description
3RD SCIENCE FOR BIODIVERSITY FORUM	
Thursday 01.12.2016 @ 10:00 – 11:00 International Convention Center	Panel discussion: Mainstreaming Biodiversity, sustainability & sectors: concrete examples The forum serves as a meeting place to share knowledge, approaches and initiatives for mainstreaming biodiversity among scientists, policy-makers and other stakeholders specifically influencing sectors such as agriculture, fisheries, forestry and tourism. The morning session will cover practical aspects of mainstreaming biodiversity, and the interlinkages of sustainability and resilience, and what this means for socio-ecological systems. More
HIGH LEVEL SEGMENT	
Friday 02.12.2016 & Saturday 03.12.2016	The High Level Segment will take place before the start of the conference itself. This will make it possible for the Ministerial Declaration issued at the conclusion of the HLS to guide and inform the negotiations that take place during the COP. The topics to be discussed are: i) the integration of biodiversity and ii) the 2030 Agenda for Sustainable Development and the Sustainable Development Goals. More
BUSINESS AND BIODIVERSITY FORUM	
Friday 02.12.2016 @ 10:00 – 11:45	Business for Biodiversity According to the 2016 Global Risks Report of the World Economic Forum, biodiversity loss and ecosystem collapse are among the 10 major risks faced by the private sector, in terms of their potential impact. In light of this, it is in the best interest of businesses to take into account the value of biodiversity and ecosystem services in productive systems. IUCN will engage in a panel discussion that will focus on the importance of biodiversity in economic development and well-being of societies.
Saturday 03.12.2016 @ 10:15 – 12:15	Session F: Partnerships and other innovative approaches IUCN will participate in this session which will present different cooperation models for doing business and invest in natural wealth, ensuring that conservation and sustainable use of biodiversity are transformed into an inclusive growth engine.
RIO CONVENTIONS PAVILION	
Tuesday 06.12.2016	Biodiversity and Climate Change Day IUCN partners with the CBD, LUC4C, OPERAs, Future Earth, ScenNet, UNEP-WCMC, BirdLife International, Conservation International, GEF, UNDP, GIZ and the Government of South Africa to discuss the link between the biodiversity and climate change, including the role of conservation and restoration of ecosystems for climate change mitigation and adaptation, to share knowledge on and exchange experiences with ecosystem-based adaptation and disaster risk reduction, and opportunities for promoting ecosystem-based approaches in the context of the Paris Agreement and the SDGs. Full programme

Parallel events at COP13

Date/ Location	Title/Description
5TH GLOBAL BIODIVERSITY SUMMIT OF CITIES AND SUBNATIONAL GOVERNMENTS	
Saturday 10.12.2016 @ 10:30 – 12:30	The role of cities and subnational governments in the new Global Development Agendas Sustainable Development Goals (SDGs) have been adopted by national governments. However, SDGs are fundamentally relevant to local and city level actors for vertical and horizontal integration of biodiversity. City and regional level action is one of the most critical climate resilience and adaptation measures across the world.
Saturday 10.12.2016 @ 15:00 – 16:00	Nature, Urban Health and well-being With more than half of the world's population already living in cities and further growth expected, the health of urban dwellers is crucial to global well-being
Sunday 11.12.2016 @ 09:00 – 10:30	Measuring what we do How can cities and subnational governments measure their contributions and achievements in biodiversity conservation for sustainability? This session focusses on the Biodiversity Registry, the Environmental Hub and the need for documenting and reporting on biodiversity.
Sunday 11.12.2016 @ 14:00 – 16:00	New Initiatives Launched
RIO CONVENTIONS PAVILION	
Monday 12.12.2016	IUCN and IUCN WCPA alongside EU, UNDP, Japan Fund, Governments of Germany, Republic of Korea, India, Mexico and Brazil, GEF, BirdLife, IFDD, REDPARQUES, and SPREP are organizing the Target 11/Protected Areas Day under the theme “ Partnerships for improving natural capital for achieving global targets and for addressing global challenges ”. The aim is to showcase the status of implementation of Target 11 and the priority actions (roadmaps) identified in regional workshops, how these roadmaps will contribute to the achievement of the target, and convey the intention of partners in helping countries implement their road maps to achieve multiple benefits. Full programme
CEPA FAIR	
Tuesday 13.12.2016 @ 15:00 – 19:00	#NatureForAll – A movement to inspire a love of nature We detail the specific strategies of partners to scale up conservation action and identify the ways to get involved with this global movement. The #NatureForAll movement is an inclusive coalition of partners who represent a variety of sectors – conservation, health, urban, protected areas, communications, technology, education, arts, tourism, science, youth, women’s organizations and networks, and more. More

Parallel events at COP13

Date/ Location	Title/Description
RIO CONVENTIONS PAVILION	
Tuesday 13.12.2016	Forest Landscape and Ecosystem Restoration Day IUCN and its partners from the Collaborative Partnership on Forests (CPF) co-organize this day entitled “ Towards ecosystem and climate-smart restoration for sustainable livelihood, food security and biodiversity conservation: A landscapes perspective to address multiple priorities ”. The objectives of this day include: providing a forum for countries and organizations to showcase planning and implementation measures to reduce forest habitat loss deforestation and forest degradation; presentation of good, reliable methodologies to assess restoration opportunities and discuss how to build momentum around the concept of ‘ecosystem and climate-smart restoration’. Full programme
Wednesday 14.12.2016 @ 11:15 – 12:45	Mainstreaming Gender Equality and Social Inclusion Day From the Ground up: drawing the links from community-level initiatives to national action to achieve the SDGs IUCN will be participating in this half day session which will explore available and emerging opportunities to advance social and environmental objectives at the national level, in particular through the implementation of the SDGs. Full programme
